Re: **Notice of Ex Parte Communication**, Reassessment of Federal Communications
Radiofrequency Exposure Limits and Policies, ET Docket No. 13-84

Dear Ms. Dortch:

On September 5, 2019, the Mobile & Wireless Forum (MWF) and the Telecommunications Industry Association (TIA), on behalf of their respective members met with representatives of OET. A list of attendees is set out below. The industry representatives' purposes for the meeting were (1) to learn from OET the available details of the proposal outlined in the FCC's announcement of August 8, 2019 and (2) to advise the OET on the status of the pending IEEE C95.1-2019 standard.

OET advised that the proposal can be sorted into three components: (1) closure of the NOI that has been pending since 2013, ET Docket No. 13-84; (2) an order that, among other items, will address a petition for reconsideration concerning the Report and Order of March 29, 2013 regarding ET Docket No. 03-137; and (3) a NPRM concerning, among other items, elements dosimetric testing such as time averaging and the appropriate averaging area. OET further advised that the proposal is in circulation with the FCC commissioners and is being reviewed by their wireless advisors.

The industry representatives summarized the status of the IEEE C95.1-2019 standard as follows: a vote approving the standard is expected this week and the standard is anticipated to be released to the public by the end of the month. Upon release of the standard, letters from IEEE will go to relevant agencies, including FCC.

Respectfully Submitted,

/s/ Charles Eger
